

arigoPLEX<sup>®</sup>

**Multiplex**  
ELISA KIT

from January 15th, 2025 to April 15th, 2025

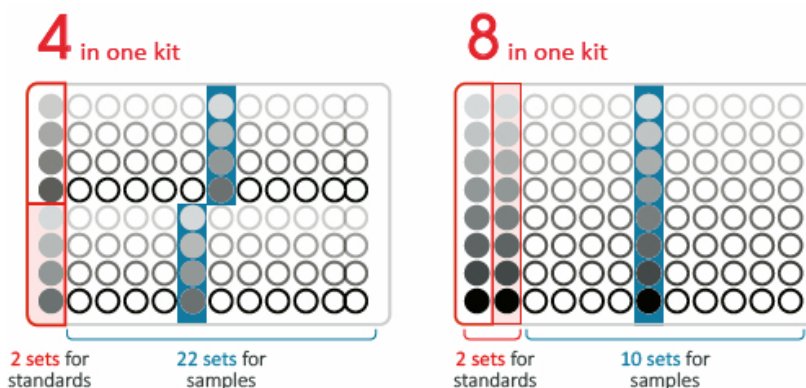

## Benefits

- Concurrent measurement of **4** or **8** factors
- Quantifying cytokines at **pg/ml** range
- **Single** detection reagent
- Measured by ELISA reader at **OD 450 nm**

arigoPLEX<sup>®</sup> Multiplex ELISA kit is an ELISA-based immunoassay that allows for multiple detection of 4 or 8 factors simultaneously. Unlike Luminex which is useful to screen cytokines as much as possible, arigoPLEX<sup>®</sup> Multiplex ELISA kit is designed to **validate specific physiological effects** by measuring the key cytokines and factors for inflammation, immune cell polarization, and cell therapy-mediated cytotoxicity, etc.

How many samples can be measured by arigoPLEX<sup>®</sup> Multiplex ELISA kit?

For 4-in-1 kit, two 12-well strips are available for each factor. One cytokine/factor is measured per well, and 4 wells as one set for one sample. Except 2 sets for standards, total 22 samples can be measured. For 8-in-1 kit, one 12-well strip is available for each factor and 8 wells as one set for each sample. Except 2 sets for standards, total 10 samples can be measured. arigoPLEX<sup>®</sup> Multiplex ELISA kit is ideal for small scale experiments in laboratory.

Simplify ELISA analysis by GainData<sup>®</sup>

GainData<sup>®</sup> is an ELISA calculator developed by arigo to simplify ELISA data analysis. It is a **free** web service useful to analyze the result of ELISA kits and assay kits. Try **GainData<sup>®</sup>** to analyze your data now.
