Rabbit monoclonal antibody SQab clones and more!

- Recombinant antibody technology
- Excellent specificity and sensitivity
- High consistency and reproducibility

Code: **EURO20** (see the list of eligible products)

Valid until December 31st, 2024

SQab clones, arigo' signature, are named after the abbreviation of "Squirrel", the mascot of arigo Biolaboratories Corp.

SQab clone recombinant rabbit monoclonal antibodies are developed by proprietary technology and validated by our extensive process that allow confidence in **specificity**, **sensitivity**, and **consistency**.

Advantages of SQab clone Recombinant Rabbit mAbs

	Specificity	Sensitivity	Consistency	IHC on human	IHC on mouse
SQ clone Recombinant Rabbit mAb	High	High Affinity 10^{12} Ko (M)	Always consistent	Excellent for all targets	Perfect for all targets
Mouse mAb	Medium/High	Medium Affinity 10^9 Ko (M)	Occasionally lot-to-lot variations	Only good for non-conserved targets	Mouse-on-mouse background risk
Rabbit pAb	Variable	Variable	Frequent lot-to-lot variations	High background risk	High background risk

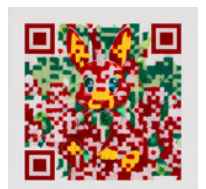

Better than Mouse mAbs :

In comparison with mouse hybridoma technology, arigo's proprietary rabbit monoclonal antibody production based on our unparalleled expertise produces the antibodies with better specificity and affinity.

Better than other Rabbit mAbs :

In addition to the proprietary recombinant antibody technology, arigo's solid validation processes ensure only the quality antibodies with high specificity and sensitivity are offered.
