

3 for 2 Antibodies

Stock up and save on your next discovery!

Valid until June 30th, 2025.

Use promo code: **B2G125**

Primary Antibodies

Highly cited polyclonal, monoclonal, recombinant, and conjugated antibodies to help you reach your goal.

When you need it all.

14k+

Polyclonal Antibodies

Polyclonal Antibodies

Recognize multiple epitopes on the protein of interest. Binds with very high affinity. Good for low abundant targets, rare species and mutated proteins.

Proteintech polyclonals are raised in rabbit.

11k+

Monoclonal Antibodies

Monoclonal Antibodies

Recognize a single epitope on the protein of interest. Low background, highly specific. Good for mid-high abundant targets.

Proteintech monoclonal antibodies are raised in mouse.

10k+

Recombinant Products

Uni-rAb™ Recombinant Antibodies

Recognize a single epitope on the protein of interest. Low background, highly specific. Good for mid-high abundant targets.

Learn more about our recombinant antibody production process at ptglab.com.

Dye-Conjugated Antibodies

CoraLite® Fluorescent Dye-Conjugated Antibodies

Proteintech offers the most extensive portfolio of fluorophore-conjugated antibodies, specifically developed and validated for immunofluorescence applications.

Now available with CoraLite Plus 488, 555, 594, and 647.

Terms & Conditions: Product of equal or lesser value will be chosen as the free product. Discount may be applied to orders of up to 9 qualifying products (up to 6 paid and 3 free products per order). Trial size (20ul) antibodies are not considered full sized antibodies and are therefore excluded from this promotion. All ChromoTek, HumanKine, and Genomics products are excluded from this promotion.. Tag/Control antibodies are included in this promotion. Antibody trial packs cannot be redeemed as a single item. This promotion code cannot be used in conjunction with any other promotional offer. The promotion code B2G125 must be quoted on your order to be applied. We cannot apply the promotion retroactively. Usual shipping costs still apply.
